Claim Rejections - 35 USC § 102 and 103

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
2. Claims 1-6 are rejected under 35 U.S.C. 102(a or e) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Scott et al (6,639,362), for reasons of record.
3. Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tiedt et al (5,625,256) further in view of Scott et al (6,639,362), for reasons of record.

Response to Arguments

4. Applicant's arguments filed 9-14-06 have been fully considered but they are not persuasive.

Applicants argument that the instant claims limit MgO to 1000 ppm while Scott et al teach up to 1500ppm of MgO is not persuasive in overcoming the rejection because up to 1500 ppm encompasses 50 to 1000 ppm. Although Scott et al teach a broader range the range taught clearly encompasses the claimed range. Less than 1/3 of the range taught by Scott et al is outside the claimed range making the claimed range at least obvious to one of ordinary skill in the art if not anticipated.

It is further argued that Scott et al teach ZrO₂ as an optional component while the instant claims require 50-600 ppm. This is not persuasive in overcoming the rejection because Scott et al clearly teach the preferred composition includes at least 100 ppm ZrO₂, see column 4, lines 42-43.

Art Unit: 1755

It is agreed that Scott et al fail to teach erbium, holmium and thulium however the instant claims are not limited to compounds of these elements. The instant claims also allow for dysprosium, which is taught by Scott et al.

It is agreed that the compositional ranges taught by Tiedt et al and Scott et al are not identical however there is substantial overlap in the ranges making the references combinable. Again the claims are not limited to Er, Ho and Tl. Not every member in a Markush group needs to be found to meet the limitations of the claims.

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
